BONAFIDE CERTIFICATE

Certified that this project report “**Food Lover – The Restaurant Website**” Work of

Raj Singh

Sachin Kumar

Anish raj

Bablu Yadav

Raj Kumar Singh	1362011194001/23	231147
Sachin Kumar	136201119408/22	227058
Anish Raj	136201119401/22	227051
Bablu Kumar Yadav	1362011194003/23	231133

In satisfactory manner as a partial fulfilment for the degree of **BCA** degree for session 2023-2026.

Acknowledgement

At the very outset, I express my thanks to GOD ALMIGHTY who blessed me with a healthy constitution and bestowed upon us the required skills to complete this project.

First and foremost, I would like to thank our Mentor and Teacher for providing full guidance and supportive environment to start this project work.

I would also like to express my gratitude to my friends and family for their encouragement and support. Their constant motivation has been instrumental in helping me to overcome challenges and complete this project successfully.

I extend my sincere thanks to all the Teaching and Non- Teaching Staff Members in the Department of Information Technology for their valuable help and support.

Abstract

This project is made for understand how a web application is designed and what are the different stages of creating an application with in a group by allotting different tasks to each group member and discussing each other for clear and even knowledge sharing.

Food Lover Website is very popular at this time we can easily our favourite food at home without going anywhere this project is based on restaurant services through which user can easily get their desired food from their favourite restaurant by simple click through their phone or laptops.

The Food Lover website is a restaurant website that offers a variety of healthy and delicious food options. The restaurant prides itself on making real food from the best ingredients and making everything by hand. They offer a range of cuisines, including vegetarian and South Indian options, and provide free and fast delivery with easy payment methods. The website also features customer testimonials and a FAQ section that answers common questions about booking tables and specials.

By working on this project, we got an exposé on HTML, CSS and JavaScript. These platforms provide extra features which help to enhance the outcome of the final project without much efforts in writing different long programming codes.

Working on this project has helped us in giving an exposé to the industrial world as how they are designed, planned, created, tested, and many more.

INTRODUCTION

About the Restaurant

The restaurant prides itself on making real food from the best ingredients and making everything by hand. The website highlights the importance of investing wisely to save costs without compromising on quality and investing in high-quality equipment for long-term and heavy-duty use.

How it Works

The website outlines the process of ordering food from the restaurant, which includes choosing a favorite food, free and fast delivery, easy payment methods, and finally, enjoying the food.

It consists of sections like home ,popular dishes, reviews, faq, contact ,finally about the restaurant and crew members of the restaurant followed by quick links of the page and social media links of the restaurant .

A header section with the logo and navbar. A popular food type section.

A fast food section. A customer testimonials and about the menu section.

A mailing list subscription section. A contact sectionA footer section.

Developed first with the Mobile First methodology, then for desktop.

Compatible with all mobile devices and with a beautiful and pleasant user interface.

Menu

The restaurant offers a variety of dishes, including Vegetable Sandwich, Burger, South Indian Idli, Raspberry Stuffed French Toast, Noodles, Pizza,

South Indian Dosa, and Vegetarian Thali. Each dish is accompanied by a description, price range, and estimated preparation time.

Customer Reviews

The website features customer testimonials, with five reviews from satisfied customers praising the restaurant's service, menu, and quality of food.

Frequently Asked Questions

The website also provides answers to frequently asked questions, including how to make a regular table booking, how to book a special, how to confirm a booking, and what to do if the restaurant does not have a booking.

Overall, The Restaurant Website is a user-friendly platform that provides essential information about the restaurant's offerings and services, making it easy for customers to make informed decisions about their dining experience.

OBJECTIVES

The objectives of food restaurant website to offers a variety of delicious and healthy recipes. The website provides an online platform for customers to explore their menu, read reviews, and contact the restaurant.

The website features a menu section that showcases various dishes, including Vegetable Sandwich, Burger, South Indian Idli, Raspberry Stuffed French Toast, Noodles, Pizza, and South Indian Dosa. Each dish is accompanied by a description, price, and estimated preparation time.

Here are the some objectives:-

- **Online Ordering:** The website allows customers to choose their favorite food and opt for free and fast delivery.
-
- **Easy Payment Method:** The website provides an easy payment method for customers to pay for their orders.
-
- **Reviews:** The website features a reviews section where customers can read testimonials from previous customers.
-
- **FAQ:** The website has a frequently asked questions section that answers common questions about table bookings, special bookings, and booking confirmations.
-
- **Design and User Experience** The website has a clean and modern design, with high-quality images of dishes and a user-friendly interface. The navigation is easy, and the website is responsive, making it accessible on various devices.

Hardware & Software

In making of this project, many different types of hardware and software tools have been used. These tools played a key roles in completion of this project without any difficulties.

Hardware and Software Tools

- Laptop/PC/
 - Minimum 2GB RAM
 - 120GB storage
 - Minimum i3 processor
- Proper Internet Connection
 - Minimum Speed 1mbps
- Software Tools
 - Visual studio
 - Operating system: windows 10, windows 11
 - **Web Browser:** Google Chrome (Supporting HTML5)
 - Github
 - Render
 - Firebase
 - Fire fox
 - Microsoft Edge

TECHNOLOGY USED

ProgrammingLanguage:- HTML, CSS, JAVASCRIPT

MIDDLEWARE:-

Web Browser:(MicrosoftEdge,googlechrome,internet explorer...)

DESCRIPTION OF THE TECHNOLOGY USED:-

HTML:

This is the language that Web pages are written in. If you want to create really great Web pages then you will need to learn this. As far as computer languages go this is the easiest to learn. You can create a Web page without it using a Web 15 page editing program but the program will still use HTML to create the page.

Key features and aspects of HTML include:

1. ****Structure****: HTML provides a hierarchical structure for web content, defining elements like headings, paragraphs, lists, tables, and more.
2. ****Semantics****: HTML tags are designed to convey the meaning of content to both browsers and developers, improving accessibility and SEO.
3. ****Hyperlinks****: HTML supports the creation of hyperlinks (anchor tags ``) that allow users to navigate between different web pages.

4. **Forms**: HTML includes form elements (`<form>`, `<input>`, `<textarea>`, etc.) for collecting user input and submitting data to web servers.
5. **Multimedia**: HTML supports embedding multimedia content such as images (`<img>`), videos (`<video>`), and audio (`<audio>`).
6. **Accessibility**: HTML provides features and attributes that help improve accessibility, ensuring web content is usable by people with disabilities.
7. **Compatibility**: HTML is supported by all modern web browsers and is designed to be backward compatible with older browsers.

CSS:

The Cascading Style Sheets Specification (CSS) is a computer language that is used to write formatting instructions (rules). These rules tell a web browser how webpage content should 'look' — in terms of: layout position, alignment, width, height, etc. style typeface, font-weight, colour, border, etc.

Key aspects and features of CSS include:

1. **Selector and Declaration**: CSS uses selectors to target HTML elements and declarations to define how those elements should be styled. For example, `p { color: blue; }` selects all `<p>` elements and sets their text color to blue.
2. **Cascade and Specificity**: CSS follows a cascade mechanism where styles can be inherited from parent elements and overridden by more specific rules. Specificity rules determine which styles take precedence when multiple conflicting rules apply.

3. ****Hyperlinks****: HTML supports the creation of hyperlinks (anchor tags `<a>`) that allow users to navigate between different web pages.
4. ****Forms****: HTML includes form elements (`<form>`, `<input>`, `<textarea>`, etc.) for collecting user input and submitting data to web servers.
5. ****Multimedia****: HTML supports embedding multimedia content such as images (`<img>`), videos (`<video>`), and audio (`<audio>`).
6. ****Accessibility****: HTML provides features and attributes that help improve accessibility, ensuring web content is usable by people with disabilities.
7. ****Compatibility****: HTML is supported by all modern web browsers and is designed to be backward compatible with older browsers.

JAVASCRIPT:

Java Script is a user interface scripting language developed by Netscape for its Navigator and Communicator World-Wide Web browsers. Microsoft has developed a compatible language, called J-Script, for its Internet Explorer browser. While the syntax of the Java Script programming language resembles that of Java, the two languages are actually unrelated. Java Script source code is embedded in HTML documents, and is interpreted by a World-Wide Web browser. Java source code is compiled into a bytecode, stored in a separate file, which the World-Wide Web browser downloads and executes separately from an HTML page.

SILENT FEATURES

The website has a clean and modern design, with a focus on showcasing the restaurant's menu and services. Here's a breakdown of the design elements:

Header Section

The header section features a logo on the left side, with a navigation menu on the right side. The navigation menu includes links to the following sections: Home, About Us, Explore Food, Reviews, FAQ, and Contact.

Hero Section

The hero section features a high-quality image of a delicious dish, with a brief introduction to the restaurant's philosophy and mission.

About Section

The about section provides an overview of the restaurant's history, mission, and values. It also features two high-quality images of the restaurant's interior and exterior.

How It Works Section

This section explains the restaurant's ordering and delivery process, with four steps: choose your favorite food, free and fast delivery, easy payment method, and enjoy your food.

Explore Our Foods Section

This section showcases the restaurant's menu, with eight dishes featured: Vegetable Sandwich, Burger, South Indian Idli, Raspberry Stuffed French Toast, Noodles, Pizza, South Indian Dosa, and Vegetarian Thali. Each dish is accompanied by a high-quality image, preparation time, and price range.

Testimonial Section

This section features five customer reviews, with images and quotes from satisfied customers.

FAQ Section

This section answers three frequently asked questions about table bookings, special bookings, and booking confirmations.

Footer Section

The footer section features the restaurant's contact information, including address, phone number, and email address. It also includes links to the restaurant's social media profiles.

Overall, the website has a clean and modern design, with a focus on showcasing the restaurant's menu and services. The use of high-quality images and brief descriptions makes it easy for customers to navigate and find the information they need.

We Pride Ourselves On Making **Real Food** From The Best Ingredients.

Besides practical experience, a simple but effective business plan should be in place which defines and describes the restaurant's concept, its targeted market and location, menu and pricing, future earnings and expenditure forecasts, and staff recruitment, training, and retention policies.

It is important to invest wisely to save costs without compromising on quality. It is also essential to invest in high-quality equipment for long-term and heavy-duty use.

We Make Everything By Hand With The Best Possible Ingredients.

A restaurant is a business that prepares and serves food and drinks to customers. Meals are generally served and eaten on the premises, but many restaurants also offer take-out and food delivery services.

Restaurants vary greatly in appearance and offerings, including a wide variety of cuisines and service models ranging from inexpensive fast-food restaurants and cafeterias to mid-priced family restaurants, to high-priced luxury establishments.

- ✓ Tasty Food
- ✓ Good Service
- ✓ Reasonable Cost
- ✓ Hygiene and Cleanliness

Testimonial

"Very good service, good menu ... not overly extensive. Food was very good quality all around. Prices were reasonable."

Frequently Asked Questions

~ How Do I Make A Regular Table Booking?

It's a piece of cake - once you've found your preferred restaurant simply select your Date and Time required, and then so long as we have an email address and phone number your booking is instantly confirmed the minute you hit "Book"

~ How Do I Book A Bookable-Special?

It's quick and easy - once you've found your preferred restaurant special, simply click 'Book Special' then select a date when its available, then the time, and then so long as we have an email address and phone number your booking is instantly confirmed the minute you hit "Book"

~ How Can I Be Certain My Booking's Been Received?

We'll send an instant confirmation email to the address used in your booking. If you book more than a day ahead, we'll also send a reminder 24 hours before your booking is due. You can reconfirm your booking using a link in your reminder email

~ What Happens If I Get To The Restaurant And They Don't Have My Booking?

Restaurant Hub restaurants are committed to honour any confirmed bookings we have generated. For added peace of mind you should always reconfirm your booking using the the link included in your reminder email, and it's also a good idea to take your confirmation email with you.

HOSTING

A food delivery website requires robust hosting to ensure reliable and efficient service. This includes selecting the right server, hosting provider, domain name, and implementing security measures.

Server Specifications

- **CPU**: Minimum 2 cores, recommended 4 cores or more.
- **RAM**: Minimum 4GB, recommended 8GB or more.
- **Storage**: SSD storage for faster performance, minimum 40GB.
- **Bandwidth**: Scalable based on traffic volume.

Web Hosting Provider

Considerations

- **Uptime**: Ensure 99.9% or higher uptime.
- **Customer Support**: 24/7 support availability.
- **Scalability**: Ability to handle traffic spikes.
- **Security**: Strong security measures and DDoS protection.

Deployment

- **Methods**: Use FTP/SFTP, SSH, or deployment services like Git.
- **Tools**: Consider using CI/CD tools like Jenkins, GitHub Actions, or GitLab CI for automated deployment.

FUTURE SCOPE & ENHANCEMENT

Here are the some future scope and enhancement:-

Mobile App Development: Developing a mobile app for the restaurant can enhance the user experience, allowing customers to order food, make reservations, and access exclusive deals on-the-go.

Online Ordering and Payment System: Integrating an online ordering and payment system can streamline the ordering process, reduce wait times, and increase sales.

Personalized Recommendations: Implementing a recommendation engine that suggests dishes based on customers' ordering history and preferences can increase customer satisfaction and loyalty.

Social Media Integration: Integrating social media platforms can enable customers to share their dining experiences, increasing brand visibility and attracting new customers.

Loyalty Program: Developing a loyalty program that rewards customers for repeat visits and orders can increase customer retention and encourage positive word-of-mouth.

Real-time Menu Updates: Allowing the restaurant to update their menu in real-time can ensure that customers have access to the latest offerings and promotions.

Customer Review and Rating System: Implementing a customer review and rating system can provide valuable feedback to the restaurant, helping them to improve their services and increase customer satisfaction.

Virtual Tours and 360-Degree Views: Adding virtual tours and 360-degree views of the restaurant can give customers a better understanding of the ambiance and atmosphere, increasing the likelihood of reservations and visits.

Accessibility Features: Incorporating accessibility features, such as screen reader compatibility and high contrast mode, can ensure that the website is usable by all customers, regardless of their abilities.

Search Engine Optimization (SEO): Optimizing the website for search engines can increase the restaurant's online visibility, driving more organic traffic to the website and increasing the chances of conversion.

Integrating with Third-Party Services: Integrating with third-party services, such as food delivery platforms and reservation systems, can expand the restaurant's reach and increase sales.

These are just a few ideas, but the possibilities are endless. The key is to identify the restaurant's goals and priorities, and then develop a strategy that aligns with those objectives.
